- Tone and Textural Changes
- Scars and Acne Scarring
- Sagging Skin
- Overall Skin Rejuvenation

"My jawline and mid face have improved dramatically and I am extremely happy with my results!"

— Infini Patient

Questions?

HOW DOES THE TREATMENT FEEL?

You will feel heat and some pressure. The treatment is tolerable but your physician will work with you to maximize your comfort level. Compared with CO2 lasers, many find the INFINI more comfortable.

HOW LONG IS THE DOWNTIME?

There is an initial redness and swelling which substantially subsides after 24-36 hours. It can take up to a week for this to completely resolve. Most people resume normal activities within 48 hours.

HOW LONG WILL MY RESULTS LAST?

Unlike many other procedures, this has long lasting results since it is your own body that is at work. The effects could last for years.

HOW LONG BEFORE I SEE RESULTS?

You can expect to see some changes soon after the procedure. However, your body will continue to rebuild collagen for several weeks after, so you will see improvement over the next six months.

HOW LONG DOES THE TREATMENT TAKE AND HOW MANY TREATMENTS WILL I NEED?

A treatment can take as little as 15 minutes and up to an hour. Your physician will discuss your goals which will determine the length and number of treatments you will need. Many see results after just one treatment.

What Is INFINIskin?

INFINIskin treatments provide unparalleled outcomes with High Intensity Focused RF (Radio-frequency) technology, delivering thermal energy deep into the dermis to stimulate collagen production for impressive results.

Achieve the youthful skin you desire, without the surgical downtime.

HOW AN INFINIskin TREATMENT WORKS

Infini uses your own body's reaction to firm the skin by delivering energy directly to the dermis through gold-plated microneedles. This unique and innovative technology protects the top layer of the skin, therefore, allowing treatments on all skin types, even tanned skin.

When the energy is delivered, it stimulates the natural growth of collagen and elastin.
